REMARKS ON THE YEAR.

The cold weather & rains in May & June made 1907 the best year for water supply for Boston since 1892. Storage was not drawn upon untill the middle of July & the stream yielded a full supply again in the first week of October. The harvest was a month later than usual & the farmers whose crops were first ready had their produce depreciated by the wet weather in August but Septr on the whole was a good harvest month The phenomenal rainfall of Oct 16th caused very little flooding in this district of Lincolnshire.
